

# Davey 3" and 4" Jumbo Floodfighter® - Petrol

Davey 3" and 4" Jumbo Floodfighters are ideal for moving large volumes of water without having to worry about what is in the water. The hefty open impeller design means these pumps can pump water with sand and small stones up to 50mm in diameter.

## Performance

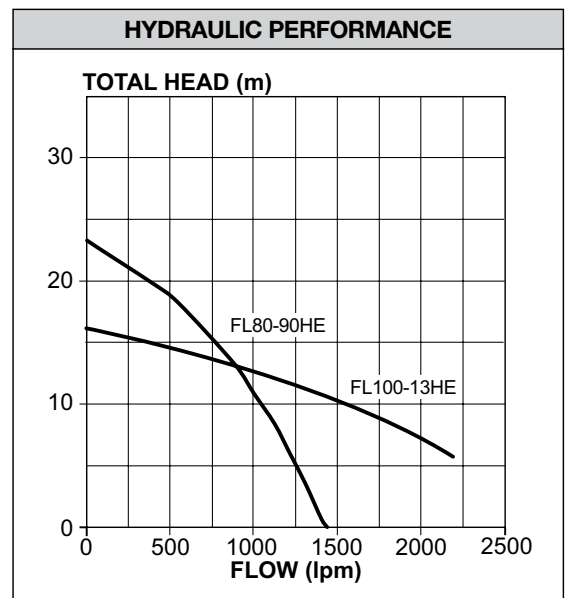

- 3" - Up to 1,400 lpm up and 23m head. Passes solids up to 32mm
- 4" - Up to 2,200 lpm and 16m head. Passes solids up to 50mm

## Ideal for:

- Construction sites, floodwater removal, tanker filling

## Why choose Davey 3" and 4" Jumbo Floodfighters?

- Easily transportable for fast response
- Hefty open impeller design gives big flow but resistance to jamming
- Class leading solids handling ability up to 50mm diameter
- Self-priming operation
- Driven by powerful and reliable Honda GX270E and GX390E petrol engines
- Corrosion resistant self-hardening aluminum construction
- Fast access inspection door for easy internal check
- Three wing nuts allow easy removal of the internal volute for quick debris removal without the need to uncouple pipes
